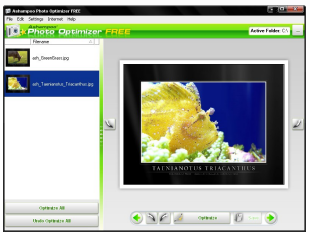
Ashampoo® Photo Optimizer

This is what the world has been waiting for: Optimize and beautify all your photos in the same folder, with just a click of the mouse.

Version 1.20, 2010/02/04



Digital Cameras are a must have: Almost everyone has one. The problem is that the self taken pictures often don't turn out as good as the photographer wanted them to. The photos are mostly too dark, and weak in contrast and colour. Often they look as if you look at them through grey fog. Naturally it is possible to use a professional picture processor, in order to work on all the picture settings belatedly, so that the photo is radiant. Only: who knows how to do that? And even those who know how to regulate all picture settings and who know all optimization instructions that a professional programme has to offer, have a real problem with time: altering pictures on the PC, can take a very long time.

In this way the Ashampoo Photo Optimizer FREE is really a world sensation, which every user with a digital camera almost imperatively needs. The programme opens individual pictures and shows them in its window. A single click of the mouse is enough to optimize the photo entirely. The effect of this optimization does not fail to impress. The photos changed by the Ashampoo Photo Optimizer FREE are livelier, brighter, lighter, sharper and have a stronger contrast. The direct before and after comparison shows precisely just how strong the optimization algorithm of the software is.

Optimize photos – in batch procedures!

Those who have tried the programme once don't ever want to work again without it. This is also because of the advantage of time. Whole picture folders can be automatically read and optimized in one go. While doing so, the programme greatly values data safety. The original data will automatically be saved to a backup folder, and even then, they will only be deleted when the user is completely satisfied with the optimized photos.

Optimize photos and turn them straight away!

Those who notice that their photos are lying on their side, or on their head, can turn them straightaway with a click of the mouse. In this way Ashampoo Photo Optimizer FREE also makes sure that the individual photos are in the correct position and order after the optimization.

Highlights:

- Photo optimization with just a click of the mouse
- Fully automatic improvement of contrast, brightness, colour intensity, sharpness
- Picture preview
- Possibility to undo the picture optimization at any time
- The untouched original remains as a backup
- Batch processing of all pictures in one folder is possible
- Turn picture to right or left

ashampoo® We Make Software!

Requirements
Operating System:

Windows® 2000, Windows® XP, Windows Vista®

Computer:

Any computer that runs on one of the above operating systems at a reasonable speed.

Graphic adapter:

Min.resolution 800 x 600 and 16-bit High color.

RAM and disk space:

64 MB RAM, Hard Disk Space 10 MB.

Languages (7):
German, English, Dutch, Spanish, Turkish, Chinese (simplified), Arabic
