

Ashampoo® BurnYa! DataCD (v1.30, 2004/10/07)

Burning data CDs was never this easy!

Screenshot

Burning data CDs was never this easy!

With Ashampoo BurnYa! DataCD you can **save your files to CD** with just a couple of mouse clicks! In fact, it's so **easy** that it's even **fun!**

Just start the program, select the files you want to store and select "Burn". That's really all you have to do. A few minutes later you have the finished data CD containing all your selected files.

Many current CD burning programs are universal "everything including the kitchen sink" applications that are overloaded with countless confusing functions. Ashampoo BurnYa! DataCD makes your life easier by concentrating on **what you really want to do!**

No more screens full of complicated settings! No more hair-tearing trying to guess your way through the labyrinth of your burner program! Just drag your files into the program and **burn your data!**

Have you ever had problems burning files with long names or names containing spaces? Were the names incomplete on your finished CDs? With Ashampoo BurnYa! DataCD you can forget about problems like this forever!

Ashampoo BurnYa! DataCD also helps you to save money on CD blanks. Since it produces "**multisession**" CDs you can always add more files later provided the disc isn't completely full. This feature makes Ashampoo BurnYa! DataCD ideal for everyone who needs to make **occasional backups of important data!**

Ashampoo BurnYa! DataCD produces CDs that conform to the ISO standard, which means that they are compatible with all computer systems.

Supports the following Windows® versions:
Windows® 95, 98, Me, 2000 and XP
