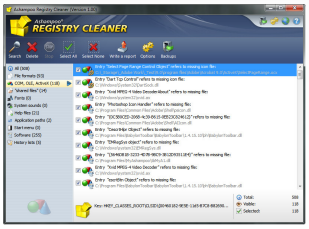
Ashampoo® Registry Cleaner

Update your registry and optimize the performance of your PC

Version 1.00, 2011/03/02



The cleaning tool for your registry

Do you remember how trouble-free and fast your new PC was? Regain some of that performance by updating the Windows® registry with the Ashampoo Registry Cleaner.

The Windows® registry is, in a way, the administrative center of your system. Different settings and configuration data for Windows® and most of your program's settings, like for example autostart settings, are saved there. Over time errors creep in the registry. One result is that your PC will become slower, e.g. when starting the system. Problems when uninstalling software and a large number of error messages could point to problems in the Windows® registry.

With the Ashampoo Registry Cleaner you will easily and safely delete redundant or damaged registry entries. Faulty links in the registry are also repaired. The real-time backup in the Ashampoo Registry Cleaner offers a maximum of safety and enables the restoring of the windows® registry into its original status anytime.

You'll be amazed how the Ashampoo Registry Cleaner will quickly and easily improve the performance of your PC!

Functions and features of the program

- Simple, intuitive user interface
- Optimized search algorithms
- Fully-automatic removal of redundant entries
- Repair of faulty links and damaged entries
- Search for registry entries that might invade the user's privacy
- Real-time backup

Small, excellent and highly effective

The Ashampoo Registry Cleaner, with its easy and intuitive handling, works quickly and effectively and ensures a clean registry on the basis of optimized search algorithms. The program with easy-to-use user interface is especially suited for newcomers. Prior knowledge of the Windows® registry is not required.

Functionality

The windows® registry, the control center of your system, saves all system settings and the settings of your hardware and software. If your registry is not regularly checked and cleaned, many problems can arise. Therefore your windows® registry, just like your hard disc drive, should be maintained regularly.

Some of the most frequent errors that occur on your PC might be based on a faulty registry. Some of these errors become more and

more evident with a longer lifetime of your computer, because the longer the operating time of your PC, the larger the number of outdated, redundant or damaged entries that will slow down your PC. When the registry is cleaned, your operating system will become faster, because of less computing power that is needed when accessing the registry. The Ashampoo Registry Cleaner scans this database and identifies faulty or broken links, in order to delete or repair those fully automatic.

Safety first

Optimal search algorithms based on more than a decade of experience lead to perfect search results. These also provide safe and extensive cleaning of the Windows® Registry which is guaranteed by the connection to the real-time backup.

The default settings are safe and the program will only find those entries that can be deleted without risk. These settings provide an optimal cleaning performance at maximum safety for your operating system. Registry entries which might invade your privacy can be identified and deleted with the Ashampoo Registry Cleaner.

Requirements
Operating System:
Windows® XP, Windows Vista™(32bit/64bit) and Windows® 7 (32bit/64bit).

Computer:
Any computer that runs one of the above operating systems at a reasonable speed.

Main Memory (RAM):
The size of the main storage is insignificant for the employment of the program. We refer to the recommendations of the operating system in use from Microsoft.

Hard Drive Space:
23 MB for the program files plus some additional space for backup files (minimal).

Other:
Full administrative rights are required to use the program.

Languages (21):
German, English, Dutch, French, Hungarian, Polish, Portuguese, Spanish, Swedish, Czech, Chinese (simplified), Bulgarian, Ukrainian, Portuguese (Brazilian), Arabic, Greek, Rumanian, Slovakian, Spanish (Argentina), Georgian, Belgian

Trial period:
40 Days (10 days + 30 days after e-mail registration)
