

# Ashampoo® Magical Security

Encrypt your private data on hard disc, CD or DVD!

Version 1.80, 2007/12/10

How often do you have an uneasy feeling when you leave sensitive files on your computer or send them to your friends by email? You know it's risky. You know anyone could intercept your mail on its way across the Internet. You know the files aren't safe on your computer. But data encryption is complicated so you try to forget about it.

## Encryption at the touch of a mouse

What if the difference between being safe and being sorry was just a mouse click? Ashampoo Magical Security really does make it that simple. To encrypt or decrypt one or more files you just select them in the Windows® Explorer and then choose Encrypt or Decrypt. That's it. And once the files are encrypted, the state-of-the-art AES encryption ensures that nobody can access the content unless you want them to. As an added extra the program can also completely wipe files from your hard drive so their contents can never be found – even by data recovery experts.

## Features at a glance

Ashampoo Magical Security is the successor to the popular Ashampoo Privacy Protector. The new program is now even easier to use, with a new look and even more powerful security.

## What's new:

- Even simpler operation.
- Integration in Windows® Explorer - all key features are now available anywhere at the click of a mouse, including CD and DVD burning.
- New industry-standard AES encryption. Security doesn't get much more powerful than this.
- DVD burning support for transporting really large amounts of encrypted data.
- Cool new design.

## What's cool:

- Maximum data security combined with extremely simple operation.
- Decrypt and encrypt selected files with a click of the mouse.
- Wipe files permanently from your hard disk so that their contents can never be found.
- Encrypt and burn your encrypted files directly to CD or DVD in a single simple operation.
- Encrypt files to a self-extracting EXE archive for mailing.
- Encrypt and burn EXE archives directly to CD or DVD.
- Integrated file manager when you're working in the program itself.

### Requirements

Operating System:

Windows® 98/ME/2000, Windows® XP, Windows Vista®

As a user of Windows® 2000, Windows XP or Windows Vista® you have to be logged in with full administration rights.

Computer:

Any computer that runs one of the above operating systems at a reasonable speed.

RAM and disk space:

Ca. 12MB for the program files, additional space for temporary files while encrypting, which means approximately the space of the files to encrypt.

### Languages (18):

German, English, Dutch, French, Hungarian, Russian, Polish, Italian, Portuguese, Spanish, Turkish, Czech, Chinese (simplified), British English, Portuguese (Brazilian), Korean, Arabic, Dansk

### Trial period:

30 Days (10 days + 20 days after e-mail registration)
